1. Summary

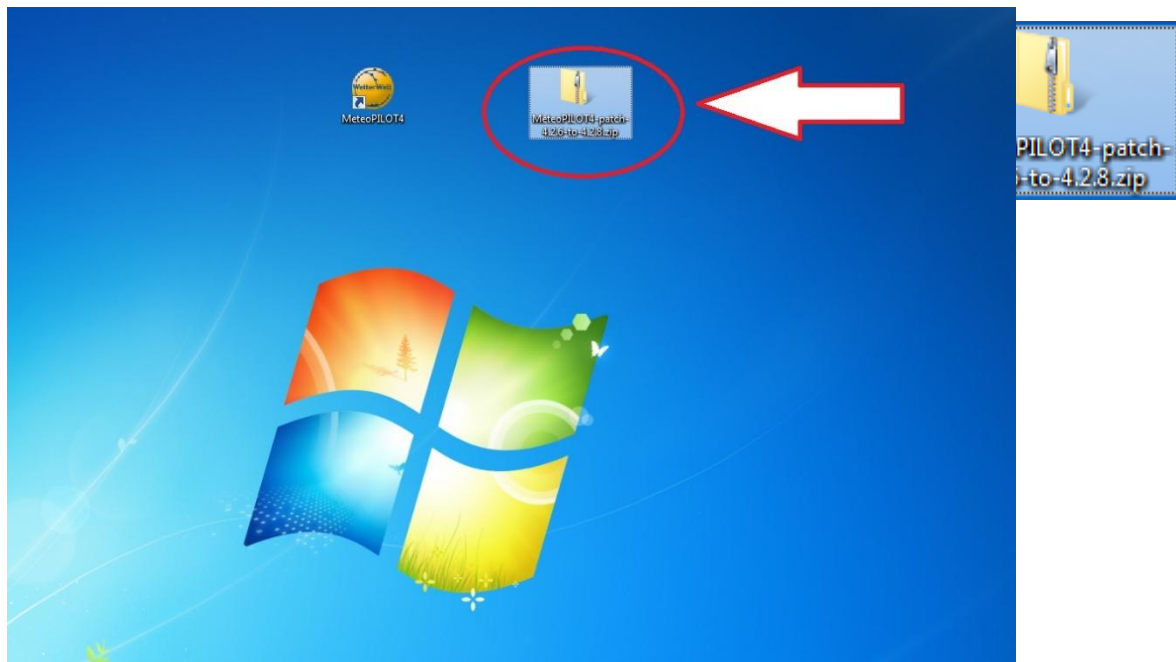

Updates of MeteoPILOT Version 4 are available as a zip-file at irregular intervals. The Updates are patches for the program and can be imported in the running program.

2. Download:

The most recent update is provided via:

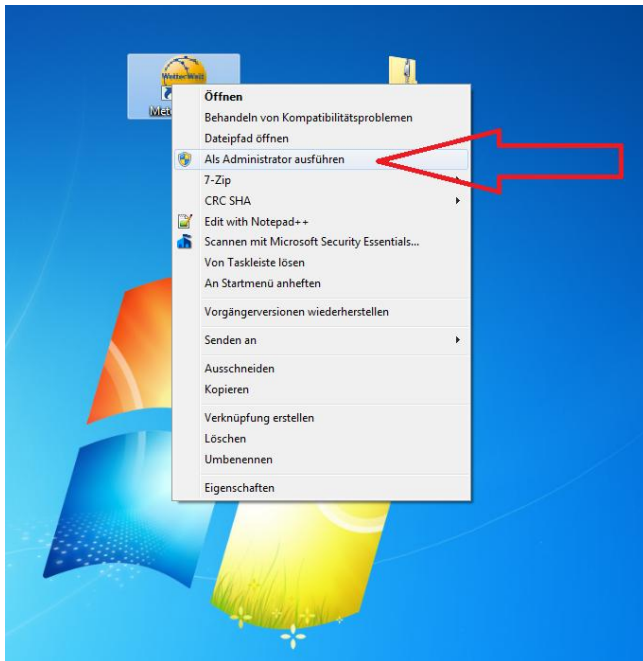

<https://shipping.wetterwelt.de/downloads>

Receive / Download the MeteoPILOT 4 – patch.zip file and save it on your local drive

3. Installation

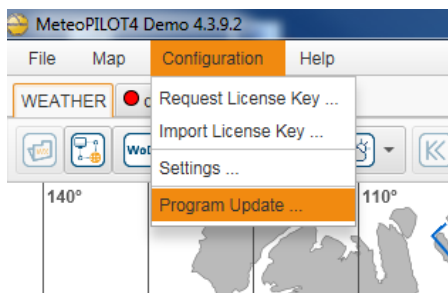

To install the new patch, start your MeteoPILOT 4 as administrator:
→ right mouse click on the MP4-icon → 'start as administrator'

Attention:

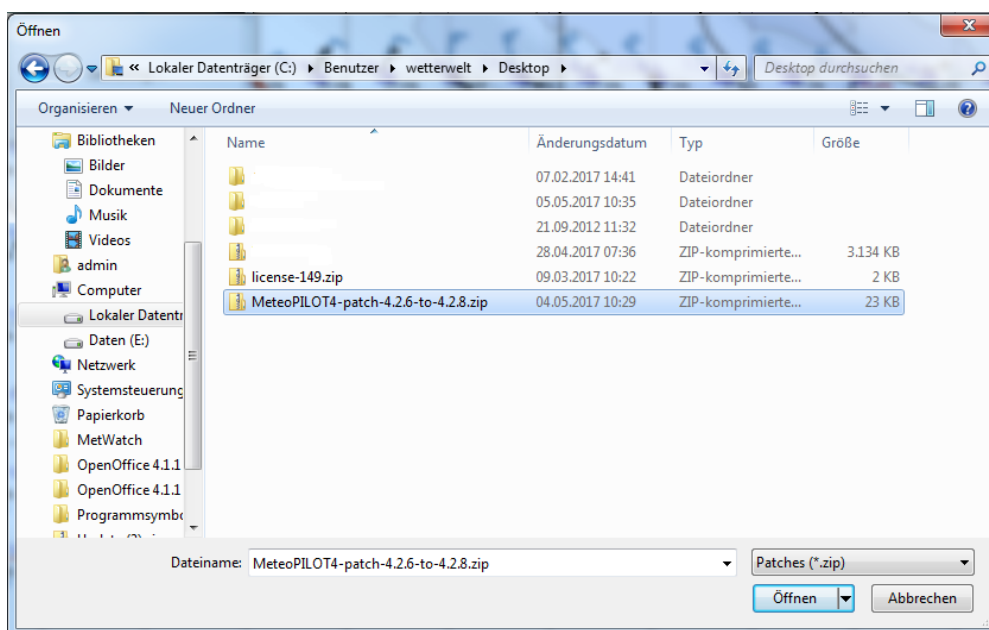

- MeteoPILOT 4 is a multi-user software and allows different users to work separately on the same computer
- All program /user related files and actions are saved / stored in your own user account
- If you start MeteoPILOT 4 as administrator, the program may start in DEMO-mode
- If so: start the program and import the Update in DEMO-Mode

Go to: main menu → Configuration → Program Update

Go to the location of the saved file, then choose and open the zip-file

When the patch has been successfully loaded in the MeteoPILOT 4, **please restart the program** as a normal user.

The current version is shown on the left side of the header bar.

Information about the installed version, the update status and details of your current license is given in the program.

Go to: main menu → Help → About
